Makkah, Saudi Arabia

SUMMARY

Recent Artificial Intelligence graduate with First-Class Honors, focused on applied AI for operational and field systems. Built solutions across IBM Maximo-integrated service request workflows, Arabic LLM/NLP, computer vision, and Arabic Human-Drone Interaction (HDI) for UAV control; selected for an international AI and computer vision student exchange program in Hong Kong.

EDUCATION

Bachelor of Science in Artificial Intelligence, *Umm Al-Qura University* *Aug 2022 – Jun 2026 | Makkah, Saudi Arabia*
GPA: 3.9/4.0 | First-Class Honors

EXPERIENCE

AI Engineer (Seasonal), *Kidana Development Company* *Apr 2026 – May 2026 | Makkah, Saudi Arabia*

- Developed an IBM Maximo-integrated LLM system to generate standardized Arabic incident descriptions before dispatch to maintenance teams, improving documentation consistency and operational data quality.
- Built a duplicate incident detection engine using business rules and text similarity analysis to reduce duplicate service requests during high-volume Hajj operations.
- Developed a real-time IBM Maximo monitoring workflow to analyze newly created service requests and flag potential duplicates early.
- Engineered secure IBM Maximo integrations while applying privacy-by-design principles and data governance controls.

Student Exchange – AI & Computer Vision Program *Jul 2025 – Aug 2025 | Tai Po, Hong Kong SAR*
The Education University of Hong Kong

- Selected for a competitive international AI and computer vision student exchange program focused on applied deep learning.
- Applied deep learning methods in research-driven computer vision projects while collaborating in an international technical environment.

Artificial Intelligence & Data Analytics Intern, *King Abdullah Medical City* *Mar 2025 – Jul 2025 | Makkah, Saudi Arabia*

- Developed interactive Power BI dashboards to support operational monitoring, KPI tracking, and data-driven decision-making.
- Cleaned, modeled, and transformed operational data using Power Query and DAX, translating stakeholder requirements into practical analytics solutions.

PROJECTS

Janah – AI-Powered UAV Search & Rescue System *Sep 2025 – Jun 2026*

- Developed an Arabic Human-Drone Interaction (HDI) system that transforms Arabic incident reports and rescuer instructions into safe, executable UAV mission commands for search and rescue.
- Integrated LLM-based Arabic command understanding with computer vision for real-time person detection and candidate matching.
- Designed and validated a human-in-the-loop rescue workflow using a DJI Tello drone, from incident reporting and mission planning to drone-based search, candidate review, and final human confirmation.

Bunyan – Smart Real Estate Monitoring System *2025*

- Designed a smart real estate monitoring solution combining Building Information Modeling (BIM), AI, and drone technology to improve construction progress tracking and decision-making.
- Selected as a finalist in Aqarathon, a Real Estate General Authority hackathon, and presented the solution to industry experts and investors.

Traffic Analysis – Vehicle Detection & Tracking *2025*

- Developed a deep learning-based system for real-time vehicle detection and tracking to support traffic monitoring and data-driven road management.

Afqah – Arabic LLM Assistant for Autistic Learners, *Allam LLM Challenge* *2024*

- Built a personalized AI education tool for autistic learners using SDAIA's Arabic LLM; challenge finalist.

COURSES

Generative AI with Large Language Models, *DeepLearning.AI & AWS* *2024*

Natural Language Processing Specialization, *DeepLearning.AI* *2025*

Artificial Intelligence Specialization, *DeepLearning.AI* *2025*

TECHNICAL SKILLS

Programming & Tools: Python, Java, C, Git, Docker | **AI & Machine Learning:** LLMs, Arabic NLP, Computer Vision, Scikit-learn, PyTorch, TensorFlow | **Data Analytics:** Power BI, DAX, Power Query, Pandas, NumPy | **Systems & APIs:** IBM Maximo, REST APIs, OSLC APIs, FastAPI

LANGUAGES

Arabic — Native | **English** — Professional Working Proficiency • STEP Score: 86%
